GREEN - Transitions involving EU Adults and authorities foster climate neutral cooperation, European Programme: Erasmus+

WHAT'S NEW?

MEETING IN ICELAND

The 3rd Transnational Project Meeting of the GREEN project took place in Iceland and we thank the Háskólinn á Akureyri, our gracious host in Iceland, for their warm hospitality.

During this gathering, project partners came together to discuss the current progress and future tasks related to the development of the educational content and the implementation of the online tool for customized action plans.

TRAINING IN 4 LANGUAGES

The training materials in English, Slovak, Greek, Spanish, and Romanian have been completed and are currently being uploaded to the online platform. The training materials contain interesting topics concerning: The EU Green Deal; Climate Neutral activities and sustainable strategies; The New European Bauhaus Initiative; Designing a project with the New European Bauhaus in mind, and Ethics of sharing.

What are the next steps?

- During the summer, the project partners are working on the preparation of a practical online tool that will allow target groups and other interested parties to prepare their **CUSTOMIZED ACTION PLAN**. The online and free tool will provide hands-on tips on how to make an action plan as simply as possible with guidance on the principles of the New European Bauhaus Initiative and the European Green Deal.
- The pilot phase for assessing the training programme and platform is coming this autumn. During this phase, we will organize different piloting sessions to gather feedback or guidance on how to improve the learning content.

STAY TUNED, BECAUSE YOUR FEEDBACK IS RELEVANT TO US!
